

# TEAM BUILDING THROUGH FIRE

## Teamsculptur

The Teamsculpture concept is a unique, Worldwide Team building Seminar in an exceptional environment.

A modern blacksmith forge.

A unique synergy between a traditional ancient Craft and contemporary teambuilding methods, all under the supervision of an experienced metaldesigner/metalsmith.

The Team develops a sculpture independently based on their themes, goals and visions. The following challenge for the team is to handle hammer, anvil and fire to create the Teamsculpture.

The whole workflow is monitored and moderated by artist craftsmen through the final steps of each sculpture.

The enthusiasm of companies such as Daimler, Porsche, Bosch, This successful Teamsculpture seminar was developed in Germany.

Many companies have excitedly realized, and created their Teamsculpture in this seminar. Siemens, HP, etc. have led us to make this seminar available to companies in the United States.

Two new locations on the east coast, Virginia, and on the west coast, Oregon. Moderated by the artist craftsmen trained in Germany and other countries throughout Europe.

With this team building seminar, you get a sustainable result for your team in the form of your own Teamsculpture.

This is a seminar for managers, trainers, and teams being brought together as a bonding experience with the result being a sculpture that every person had a hand in creating, from design concepts to the production of the final sculpture.

We will relate to your current issues such as:

The take over of a new team, the formation of a new project group, motivating your team for new goals, recognizing the communication structures, resolve conflicts, increase the team dynamics, integration of new team members.

Convince yourself you will find our references, further information and impressions on our website, [www.teamsculpture.com](http://www.teamsculpture.com). Need a hotel, conference rooms and transfer? We are pleased to make you a complete offer. Please do not hesitate to ask as any questions.

# TEAMSCULPTURE

From the idea to the sculpture

Your team will be challenged with an unfamiliar task in this extraordinary environment. This creates space to dissolve the day by day structure and dynamic of your team. The creative development process helps the team to rediscover their tasks and goals and maybe even their visions. This so developed content will be visualized in a Teamsculptur. This symbol being put up in the department or company will remember the team of their achievement and internalises it. An integral/holistic and collective experience. From the idea to the finished Teamsculpture. More motivated and better cooperating, identifying and knowing the common goal.

## Seminar content

- The topics will be aligned with the team leader, trainer or coach.
- Moderation and supervision of an experienced metal craftsmen.
- Protective clothing, tools and materials.
